

Your On-Field Device Management Solution

Powered by Amazon DSP Program

Streamline logistics with Scalefusion UEM: Manage, control, and secure your on-field devices effortlessly from one dashboard

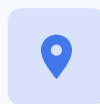

Discounted Pricing for Amazon DSPs | Multiple Deployment Modes | Free Live Chat

Delivering Simplicity and Efficiency to Logistics Operations

App updates with just a single click

With features like silent app installation, remote app updates, app configuration for selective access and data usage tracking for apps, stay on top of your business.

Tracking your devices in real-time

Keep track of your device inventory, on-field staff's productivity and location updates. Track device location in real time and always be on top of your day-to-day operations.

Troubleshoot with remote cast & control

Avert the need for physical site visits, run commands, resolve device issues and manage activities on your devices remotely.

Disable hardware settings & airplane mode

Take control of device buttons such as volume, screen lock or even settings like Wi-Fi, Airplane Mode, GPS Location and more.

Locking your devices to business apps only

Lock any devices in single or multi-app kiosk mode, preventing unauthorized access and limiting excess data costs

24*6 Free live chat support

Get free support no matter what time zone you're in. Our median response time is less than 5 minutes.
